About Us

OM Tech is a full-service software development company with headquarters in the U.S. and India. Equipped with a team of talented individuals, collectively bringing dozens of years of experience and technical expertise to the table, OM Tech can support software development and application, custom application development, and unique retail productivity applications that help businesses improve their numbers.

Additionally, OM Tech provides services like Quality Check, project analysis, and IT consulting, building a library of software components that help them outshine the competition in every element of cost-effective accuracy. In this same vein, OM Tech is known for their mobile technology expertise, assisting clients to develop Android, iPhone, and cross-platform applications that make the purchasing and interaction experience more accessible for all consumers.

From cloud integration to mobile app development, our team is ready to work side-by-side, creating new solutions that are right for your business.

NACS Standard POS Back office integration software

We've created a back office solution that is a user-friendly mobile tool, as well as a PC application, that enables CStore managers to manage inventory and pricing effectively. Through the app, managers can quickly look at hourly sale history, providing them with the smart resources they need to make quick decisions about how to best allocate their resources. The result? A more productive and profitable business.

Our app contains multiple models, including: hourly, weekly, and monthly sales history; daily drop counter to avoid error in cash counting; product management system for managing product data; gas inventory and monthly reconciliation of actual sale versus stick reading; order management; instant lottery ticket sale tracking to reduce shortages; and product inventory tracking that tracks variance sale and actual inventory on any given product.

It's an all-in-one CStore management solution that will totally revolutionize how you approach business moving forward.

The logo for NACS, with 'NACS' in blue and 'S' in green, followed by a registered trademark symbol.

The following screen will allow the user to update product price, cost or name in bulk making data management very simple.

4. Gas inventory and monthly reconciliation of actual sale vs. stick reading

The biggest challenge for a GAS station to reconcile gas inventory this application allows the user to enter their daily transactions and actual tank reading to generate monthly report intentionality.

GAS Variance Report : October 2018

Regular Gas Data (1% of total sales + 130) - Variance 335.7784 - 14464.84								In Compliance? No	MidGrade	Super Gas Data (1% of total sales + 130) - Variance 155.6959 - -241								In Compliance? Yes

5. Order management

One click order generation based on the threshold set for a given product. Also, this application is smart threshold management for product groups. Also, this application converts orders to invoice and invoice to inventory, Which eliminates the requirement to enter stock into the system. An additional feature to integrate delivery invoice to accounting software.
